Fri, 07 Dec 2018 10:09:00 GMT 15 000 problems from mathematical pdf - In combinatorial mathematics, a derangement is a permutation of the elements of a set, such that no element appears in its original position. In other words, derangement is a permutation that has no fixed points.. The number of derangements of a set of size  $n$ , usually written  $D_n$ ,  $d_n$ , or  $!n$ , is called the "derangement number" or "de Montmort number". (These numbers are generalized to ...
